11/4 Essay: We have five reading/watching slots left on our schedule. I'm looking to replace one that's there now I think is on the weaker side (Thursday 11/18) and I want your help. What topic haven't we discussed (or will discuss) within the realm of data science and/or human development that you would like covered and discussed in class? Is there a particular video or reading you are aware of that you like or think is valuable that you want the rest of the class to see/read? Briefly explain your thoughts and provide a link, if applicable. I will read your responses later today. You have until 10:05

Overall, I am someone who is really interested in natural disasters and meteorology as it relates to data science, models, and statistics. I feel like we have barely talked about this subject at all in class, if we have even talked about it at all. With what I am learning in Haiti, it is really interesting to examine how the climate impacts human development, most specifically natural disasters in susceptible locations, and how it results in a major set-back for these given nations. In Haiti, the result of multiple natural disasters, one after another, has left people without jobs, families, and access to proper healthcare. What I find most interesting about the weather as it relates to human development is that this is something we simply cannot control. What I mean is that if a storm destroys your community and indirectly one's livelihood, this was past human control. But with other issues like violence and weak governmental control, it is within our human power to make issues like these better. Below, I have provided a few links to different videos that I find interesting relating to these topics. I think these videos are interesting and would grab our class's attention as it relates to data science.

This is a really good video, it brings a lot of interesting things together related to development: https://www.youtube.com/watch?v=Km2m4H2TdoY

Other interesting videos/studies: https://video.search.yahoo.com/yhs/search;_ylt=AwrC4StA4oNhNVMAFwcPxQt.;_ylu=Y29sbwNiZjEEcG9zAzEEdnRpZAMEc2VjA3BpdnM-?p=how+the+weather+impacts+human+development&type=q3080_D3Q71_ext_bcrq&hsimp=yhs-tabitab&hspart=ima&ei=UTF-8&fr=yhs-ima-tabitab#id=25&vid=3009cada68e9259d109dde662e981a3e&action=view
